

Get Up and Go with **FIREFOX SYNC**

Firefox Sync is integrated into Firefox for desktop and mobile. Firefox Sync gives you access to your Awesome Bar history, bookmarks, open tabs, passwords and form data across multiple computers and mobile devices.

SECURITY

For Your Eyes Only: Firefox Sync is the only service with end-to-end encryption.

Only you have access to information like your passwords and browsing history.

Office

Working late and the only one in the office, get home before dark and pick up where you left off by accessing the same open tabs on your home computer. And your information is encrypted so only you can access it.

SERVER

You can even run Sync on your own server to share and synchronize data between networked computers.

Home

Looking at driving directions on your desktop but need to leave in a hurry? Just get up and go and have your history and open tabs waiting for you on your mobile phone.

Phone

Get Up and Go: Enjoy the benefits of accessing history, bookmarks, open tabs, passwords and form data on your mobile devices - and avoid a lot of typing.

Never Start From Scratch: Get a new computer or phone, but always have your Firefox. Don't worry about resetting passwords or retyping long and painful URLs that you've already visited. Firefox Sync saves your bookmarks, passwords and form data so you can hit the ground running at your desk or on the go.
